

# MOP-28 DUAL-LAYER POP FILTER User Manual

## Hello!

Welcome to the LyxPro™ family. This guide helps you get to know your new microphone pop filter a little better. For additional information and technical support, please contact our helpful team at [info@lyxpro.com](mailto:info@lyxpro.com).

## Intended Use

This dual-layer pop filter is a reengineered version of the original LyxPro™ MOP-8 pop filter, both of which are designed for recording vocals in the studio with condenser microphones.

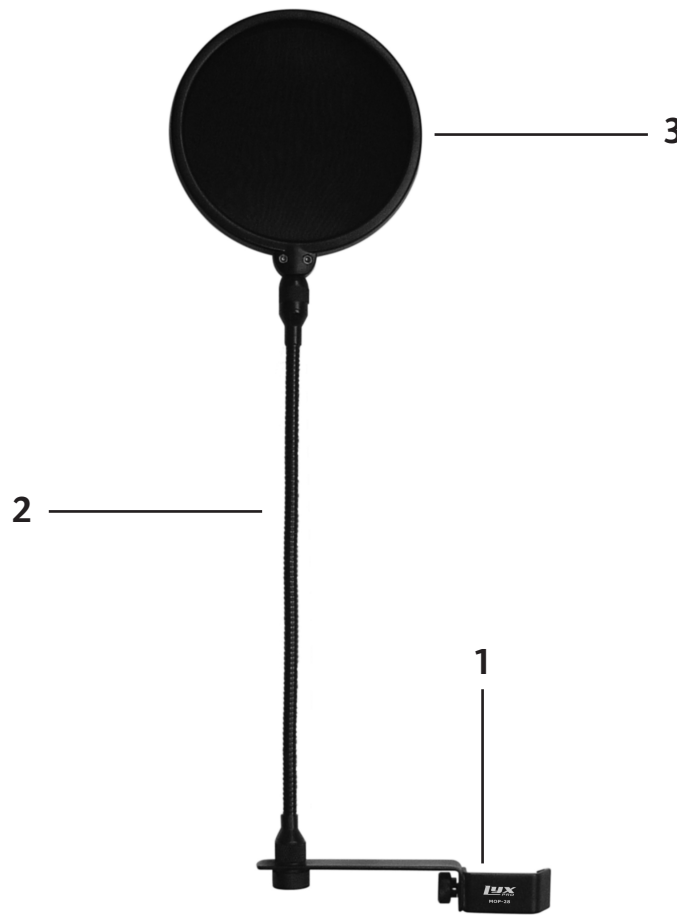

This filter reduces sibilance and plosives that are usually present when signing words with 'S' and 'P' sounds. The result is clearer audio, more professional vocal tracks, and prolonged microphone life.

## What's in the Box?

- 1 x Dual-Layer Pop filter
- 1 x User's Guide

## Parts & Controls

1. Screw-On 'Long Arm' Clamp
2. Flexible Metal Gooseneck
